Summary:

Finance and analytics professional with a strong understanding of financial concepts, business processes, and data-driven decision-making. Experienced in **Excel, SQL, Power BI, Power Query, and Python** for analysis, visualization, and reporting.

Projects:

Cauvery Hydrological Data Analytics: [Main -Project](#)

- ✦ Analyzed hydrological and agricultural data (2021–2026) across Karnataka and Tamil Nadu to uncover an upstream-downstream water imbalance. Karnataka retains more reservoir storage while Tamil Nadu's delta districts face deficits, especially in the Samba and Kuruvai seasons.
- ✦ Built an end-to-end analytics pipeline (Python for cleaning/EDA, Power BI for DAX-driven dashboards) that quantified rising groundwater dependence due to insufficient canal supply, identifying Thanjavur, Thiruvavur, and Nagapattinam as the most water-stressed districts and supporting data-driven reservoir release planning.

Inter State Renewable Energy Project: [Mini- Project](#)

- ✦ Cleaned and transformed multi-sheet renewable energy and power outage datasets using Power Query Editor for improved data quality and consistency.
- ✦ Developed advanced DAX measures including PLF%, Energy Availability %, Outage %, and Renewable Share %. Designed an interactive Power BI Dashboard with Map, Treemap, Line Chart, Donut Chart, KPI Cards, and Matrix visuals. Delivered actionable insights on state-wise performance, outage patterns, and renewable energy efficiency.
